

Fig. 1

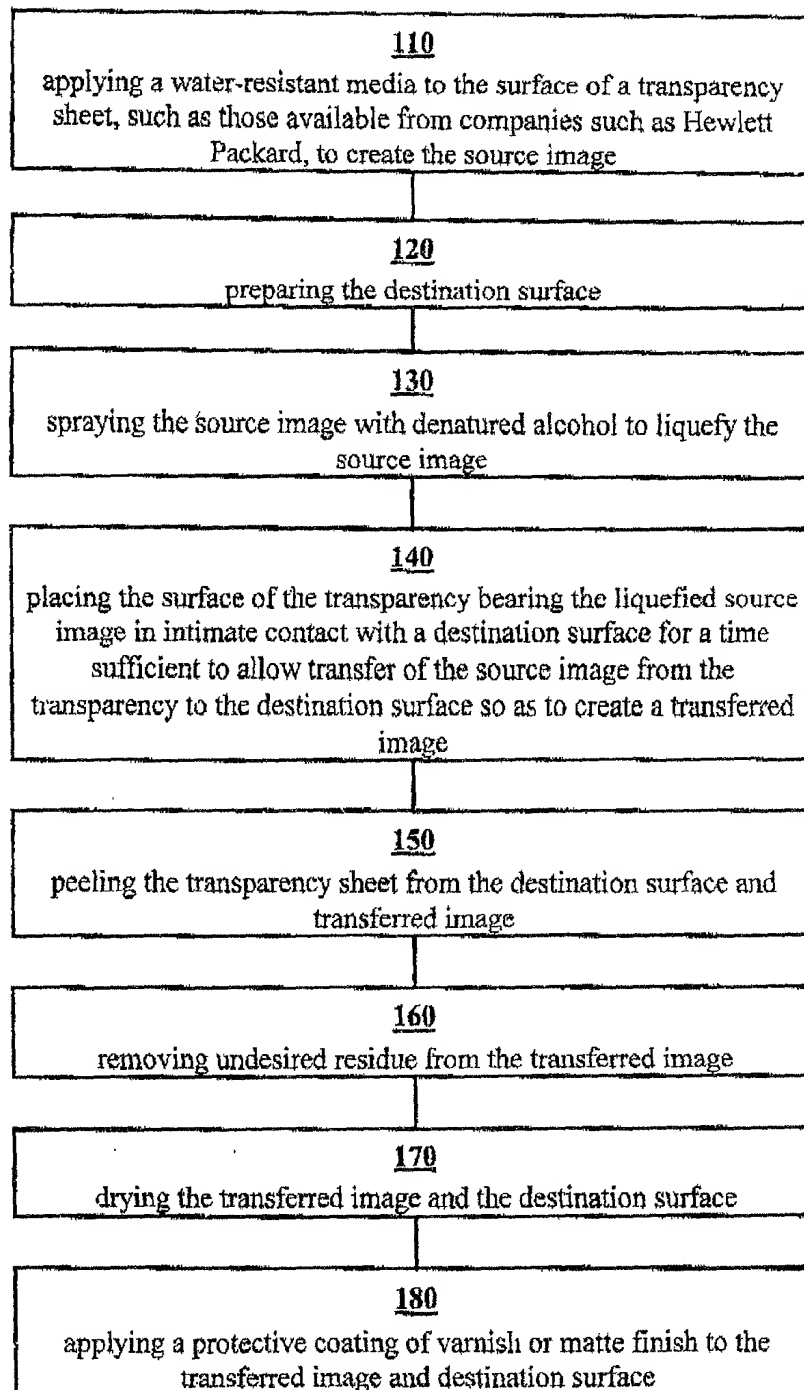

Fig. 2

A high-contrast, black and white photograph of a person's face, heavily shadowed and grainy. The image is framed by a dark, irregular border. The person's face is the central focus, with deep shadows on the right side and highlights on the left. The image has a very high level of contrast, resulting in a loss of mid-tones and a grainy, almost abstract quality. The person's features are partially obscured by the shadows, but the overall shape of the face is discernible. The background is mostly white with some dark speckles and noise.
